DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 1, 2009 has been entered.
2. Claims **1-42** are pending in this application.

Response to Arguments/Amendment

3. Applicant's arguments with respect to claims 1-42 have been fully considered but are moot in view of new ground of rejection.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. The method steps recited in the claims 1-42 are not shown in the drawings. Therefore, the features recited in the claims must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate

Art Unit: 3692

prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-29 and 38-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-29 and 38-39, the "if" statement (recited in claims 1 (step f), 22 (step g), 23 (step g), and 38 (steps c, e, f, h) renders the claim indefinite because it

connotes optional language whereby the limitations potentially and alternative are not required to perform the limitations.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 1-42 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 30-37 and 40-41 are rejected under 35 U.S.C. 101 because the claims recite a system defined merely by software. Regarding to claim 30-37, claiming (a) “a plurality of user party modules” defined merely by software (examiner suggests that if (a) would amend as “a plurality of computer connected over a network comprising a plurality of user party modules...” would overcome the 101 rejection). Regarding to claims 40-41, claiming (a), (b), (c) “an intention data structure”, “a negotiation control program” “a unifier” defined merely by software (examiner suggests that if (a), (b), (c) would amend as: (a) a memory comprising an intention data structure holding...; (b), (c) a processor comprising: a negotiation control program controlling ...; a unifier, associated with said negotiation control program, unifying...). However, in order to clarify more about 101 issue, examiner suggest the applicant to contact the examiner to

Art Unit: 3692

discuss how to amend the claims to over the 101 rejection, in order to expedite the prosecution.

Claims 1-29, 38, 39 and 42 are rejected under 35 U.S.C. 101. Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must (1) be tied to a machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. In *re Bilski et al*, 88 USPQ 2d 1385 CAFC (2008); *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Here, applicant's method steps fail the first prong of the new Federal Circuit decision since they are not tied to a machine and can be performed without the use of a particular machine. Regarding to claims 1-29, the steps d, e, f recited in claim 1 are not tied to a machine and can be performed without the use of a particular machine. Regarding to claims 38-39, the steps b, c, e, g, h recited in claim 38 tied to a machine and can be performed without the use of a particular machine. Thus, claims 1-29, 38, 39 and 42 are non-statutory since they may be performed within the human mind.

The mere recitation of the machine in the preamble with an absence of a machine in the body of the claim fails to make the claim statutory under 35 USC 101.
